ADAC Luftrettung in Germany is to carry out a feasibility study and trial a pilot project to use the Volocopter manned multicopters to transport emergency doctors to patients more quickly than is possible with emergency response vehicles. To test the theory two regions have been selected for the project, the emergency service area of Ansbach with the Dinkelsbühl HEMS base in Bavaria, and the State of Rhineland Palatinate.

Initially the Institute for Emergency Medicine at Maximilian University in Munich will carry out computer simulated aeromedical missions, using the electric-powered Volocopter for both regions. These would be followed by research flights, with the first results of the trials expected later in 2019 in the autumn/winter period. The cost of the complete 18 month feasibility study is estimated at Euro 500,000, funded by the ADAC charitable foundation.

If successful Volocopter, which is headquartered in Bruchsal in Germany, is proposing to develop a dedicated variant of its multicopters, fitted out for emergency services and use as an air shuttle for emergency doctors.

Robinson Approved Service Centre

HQ Aviation, the British helicopter training school and maintenance centre has expanded its list of approvals through its appointment as a Rolls-Royce RR300 Authorized Service Center. Engine manufacturer Rolls-Royce confirmed HQ Aviation has joined the RR300 Service Center network, which offers global, approved maintenance support to RR300 powered Robinson R66 operators worldwide. HQ Aviation was assessed by H+S Aviation, who have been given delegated rights by Rolls-Royce to ensure compliance with the engine manufacturer's requirements.

This approval expands on HQ Aviation's relationship with Robinson Helicopter Company. HQ subsidiary Global Rotors, based in Scotland, are dealers for Robinson and HQ Aviation are an approved Robinson Service Center for R22, R44 and R66 models.
