Helicentre Aviation, Leicester Airport, Gartree Road, Leicester, LE2 2FG

The US FAA recently approved the Onboard Systems cargo hook installation on the Robinson R66 helicopter, which increases the maximum gross weight of the aircraft to 1315kg (2900lb) and allows the carriage of external loads up to 544kg (1200lb). Robinson introduced the cargo hook at HeliExpo earlier this year.

In addition to the cargo hook, the installation includes right and left seat controls to allow solo flight from either seat, a left seat hydraulic switch and start button, a load-weight gauge and a second set of engine torque and gas temperature gauges embedded in the left door sill, to allow the pilot to check engine performance whilst monitoring the external load.

MJB Investments, based in Seattle, Washington State, took delivery of a new H130 helicopter from the Airbus facility in Grand Prairie, Texas on 15 August. The aircraft, registered N1985M, will be operated on corporate missions in the Washington State region.
